

ADVANCING RESOURCES TO CHANGE HEALTHCARE

A Division of the UCF College of Medicine

Your Healthcare Solutions Partner

HealthARCH is transforming healthcare every day. A leader in the widespread adoption of Electronic Health Records since 2010, our work has expanded to include additional healthcare related services. We focus on assisting healthcare professionals to successfully function in and navigate today's marketplace.

UNIVERSITY OF CENTRAL FLORIDA

HEALTHCARE IS EVOLVING

New payment models require providers to focus on quality and outcomes, and physicians need to be prepared to demonstrate both value and cost savings to remain competitive and maximize revenue. The demand for practices to be more efficient and patient-centered is increasing, and the use of Electronic Health Record (EHR) data has become integral to providing better care to patients.

OUR APPROACH

We know every practice is different. That's why we create a work plan tailored specifically to your practice.

Our team of experts spend time getting to know your needs, concerns, and workflow for a customized, hands-on approach.

A dedicated account manager will be assigned to you to advise and guide you, because we know it is challenging to implement all these changes alone.

Stay ahead of the changes in healthcare.

Be prepared for value based payment models, avoid CMS penalties and position your practice for bonus payments. We will help you better manage your data, improve care coordination, and reduce costs. Don't get left behind when it comes to Health IT.

- \$48.3 Million In EHR Incentive Payments Earned
- 4,000 Medical Professionals Have Received Revenue Cycle Training
- 300 Providers Assisted With Medical Home Practice Transformation

Making a difference with our clients every day.

“Since the adoption of our EHR system, we have had fewer holes in communication and more accountability for staff.”

— Dr. Victor Roberts, Endocrinologist, Lake Mary, Florida

“You have taken me from the dark ages into the 21st century...I would highly recommend them. You are all true professionals.”

— Dr. Zulma Cintron, Internal Medicine, Oviedo, Florida
